Luzmo

What's new?

Single Sign On

Stronger security & easier compliance

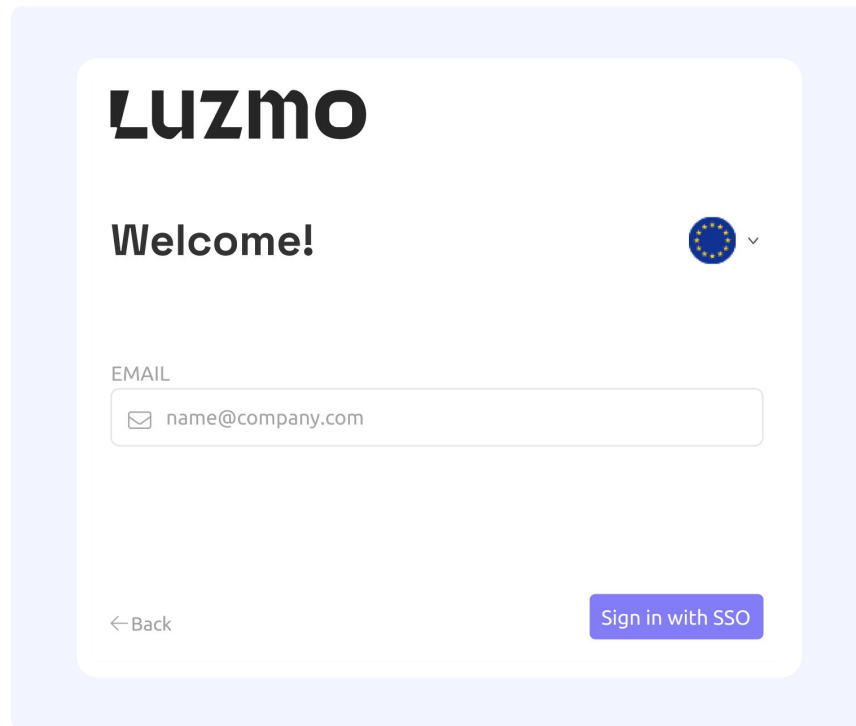

With SSO, your team logs into Luzmo using their existing company credentials.

Seamless user experience

Users can sign in to Luzmo with a single click from familiar tools like Okta.

Controlled rollout with peace of mind

Admins can configure and test SSO at their own pace, with built-in safeguards to prevent lockouts.

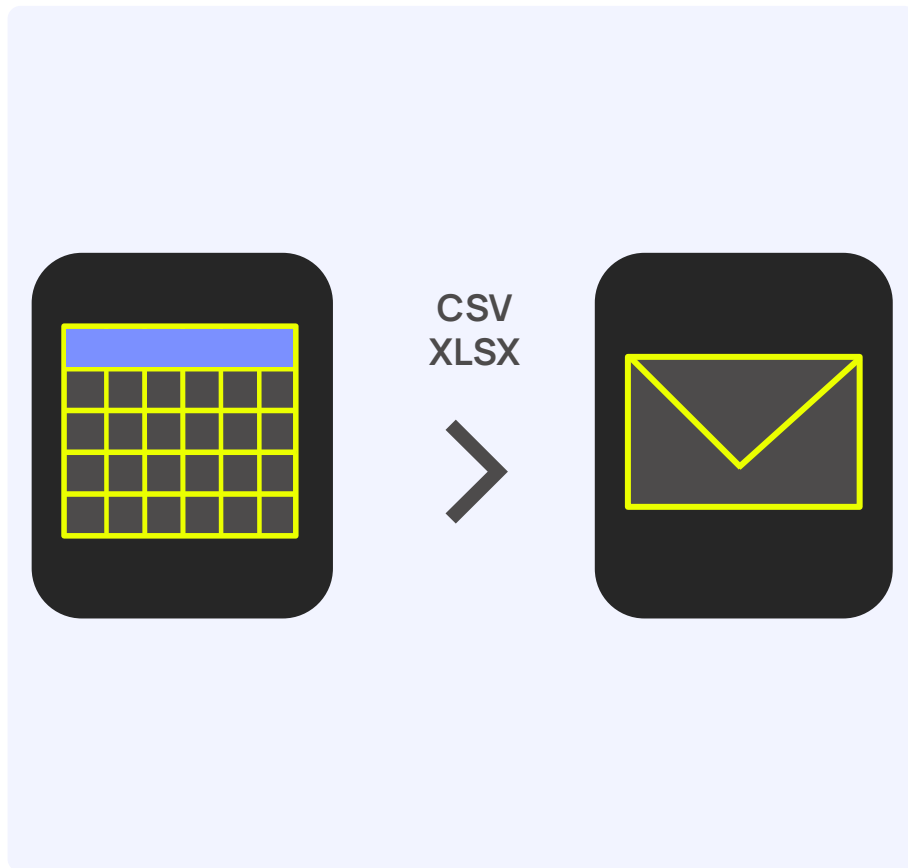

Large file exports for tables

Export complete datasets with confidence

Users can now export full tables in CSV or XLSX, without size limitations on their data.

Smooth experience for all table sizes

Exports of up to 700,000 cells download instantly in the browser. Larger tables are handled in the background, with a download link sent by email.

Variable Period over Period

Compare any two periods

Allows dashboard users to compare any two variable periods with our new “Date comparison filter”.

Support for hierarchical data as category

Next to period comparisons over time, we introduce period comparisons across categories.

Combine various comparisons

Add multiple period comparisons in a single chart.

Agent API's

Building blocks to power AI workflows

Make use of specialized AI agents that query, transform, describe, and visualize your data. Build any AI feature, agent, or workflow on top.

Build your own

Use Luzmo's AI agents through our API when you need a specific AI data skill to power your own workflows or automations.

Agents

Create dataset
column descriptions

Find relevant
datasets and columns

Create formulas

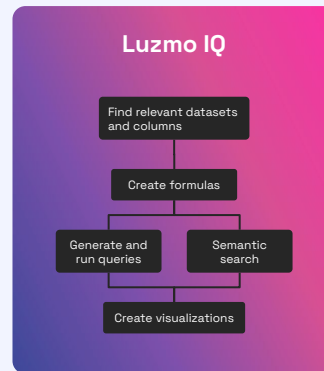

Generate queries

Semantic search

Create visualizations

Workflows

Example:

Other Q3 Releases

Flex improvements

A series of updates that improves reliability of Flex visualization components

Use examples from developer docs live in playground

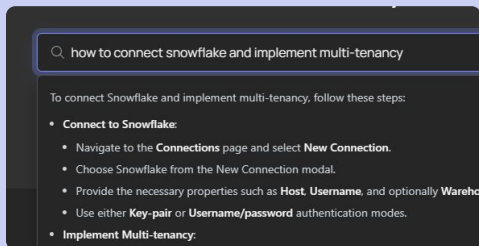

Get familiar with Luzmo's API by playing live with our examples

Email exports for embedded users

Allow your users to schedule email exports

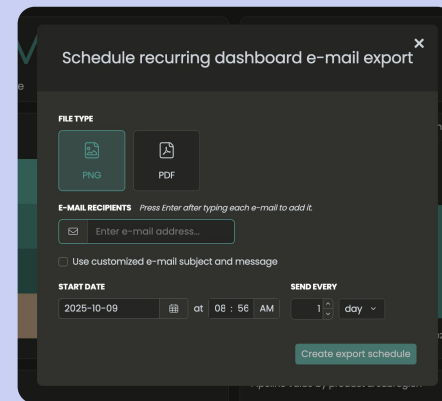

AI search in Luzmo Academy

Instant answers to your questions

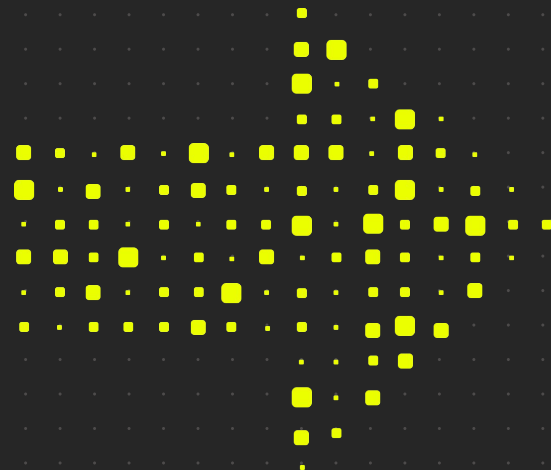

Realtime embeddings for Luzmo IQ

No need for Warp or to configure "AI Vector Embeddings" when using semantic search in Luzmo IQ

LUZMO

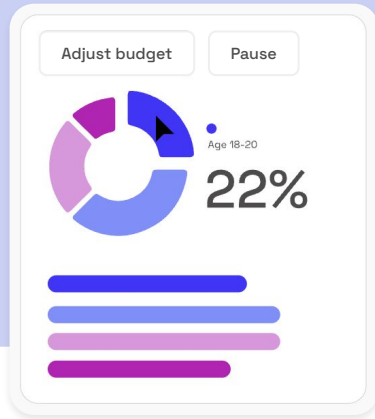

Roadmap

2025 Pillars

Building data products

Go beyond dashboards to build any analytics UI. Combine the simplicity of our Luzmo's editor with the flexibility of our embeddable components and APIs.

AI

Advance Luzmo IQ as the leading edge of AI-powered analytics, while further integrating AI across all our products and APIs.

Success at scale

Provide large organizations with the tools and processes to work with our platform at scale.

2025 Roadmap Q4

Building data products

Add analytical capabilities in a modular approach.

AI

Refine Luzmo IQ and leverage AI capabilities throughout Luzmo.

Success at scale

Making platform management easier for large organizations.

AI-first Luzmo Studio

Create and edit complete dashboards by chatting in Luzmo Studio.

Ask for a chart or insight

+ AI startups 1 year

Create a good visualization of industry distribution of AI startups for the last 3 months

Luzmo IQ - 2.0

Answer any data question, faster and with higher accuracy.

Hi! I'm your smart assistant. Ask me any question about your Sales data!

Here are some suggestions to get you started.

Who are our main competitors?

Automated data preparation

Quality starts at the source. Automatically enhance your metadata.

AI Dashboard summaries

Generate instant executive summaries with our new dashboard widget.

Good morning, Marcus.

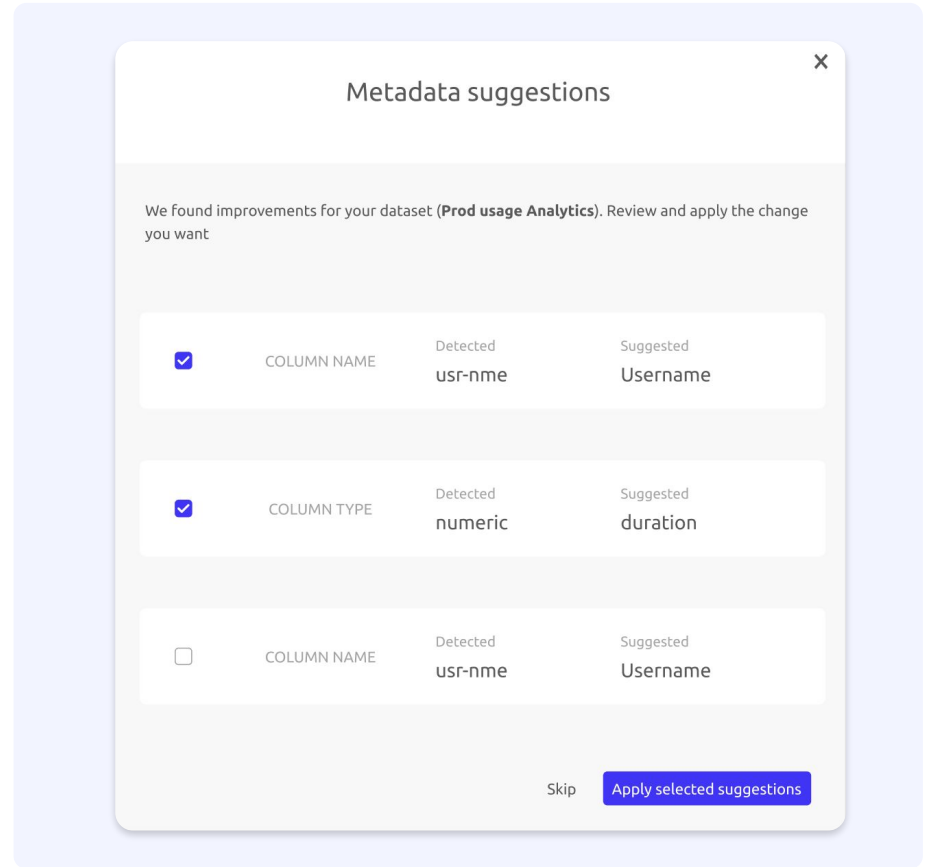

KEY INSIGHTS FOR OCTOBER 8, 2025

Here is a quick overview of your team's performance: **Misty Campbell** leads in Deal velocity at 1.2x per day and maintains the lowest Mean Days in pipeline (119.88), indicating highly efficient revenue generation. In contrast, **Kevin Howard** closes the highest Total closed-won Amount (\$1,296,704), a slower Deal velocity (\$319.46) and the longest average pipeline duration (213.83 days), suggesting need to accelerate deal cycles for even greater impact.

Metadata audit

AI-powered metadata suggestions

- Cleaner metadata strengthens AI-powered features like Luzmo IQ.
- Get instant recommendations for clearer column names, data types, and descriptions.
- Trigger metadata analysis directly from the Dataset Editor.

AI-first Luzmo Studio

Build and edit dashboards in minutes

Speed up dashboard building through natural language workflows.

Stay in control

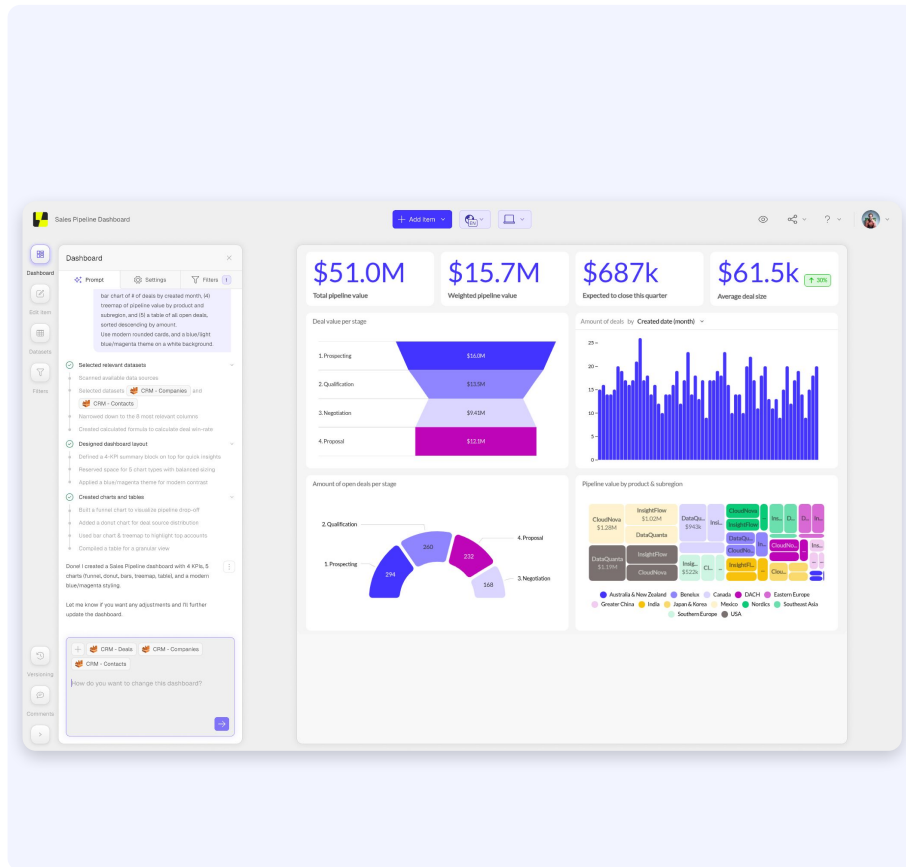

Switch between AI-guided creation and classic settings menus/drag and drop anytime.

Transparent by design

Every AI action is visible and reversible.

Built into Luzmo Embedded Studio

Empower your users to create dashboards effortlessly, without dealing with UI or data model complexity.

AI Dashboard summaries

Make anyone understand data

Provide executive summaries of your dashboards that help users to get insights quicker.

Dashboard summary widget

Available as widget in Luzmo Studio to make it a one-click implementation.

Good morning, Marcus.

KEY INSIGHTS FOR OCTOBER 8, 2025

Here is a quick overview of your team's performance: **Misty Campbell** leads in Deal velocity at \$555.20 per day and maintains the lowest Mean Days in pipeline (119.86), indicating highly efficient revenue generation. In contrast, **Kevin Howard** closes the highest Total closed-won Amount (\$1,296,704) but with a slower Deal velocity (\$319.46) and the longest average pipeline duration (213.63 days), suggesting a need to accelerate deal cycles for even greater impact.

Luzmo IQ - 2.0

Speed

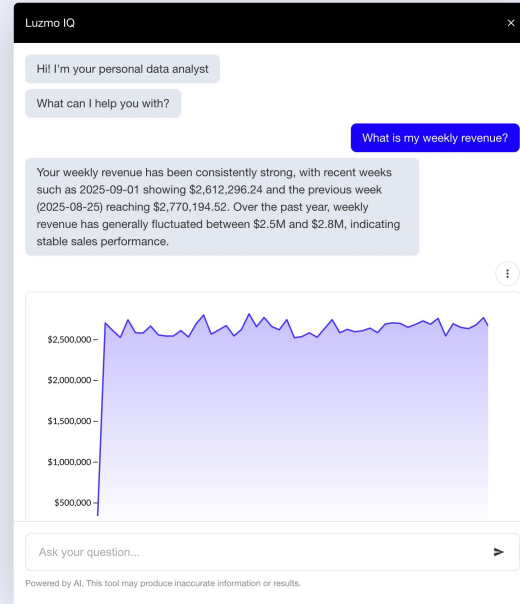

Get answer faster and make the conversation flow.

Accuracy

Engineered to rely heavier on Luzmo's query engine, access control, and visualization types as guardrails for quality.

Agency

More decision power for AI in problem solving, while adding guardrails and predictability through Luzmo's data layer.
