LUZMO

Roadmap 2026-Q1

LUZMO

What we heard

LUZMO

500+
feature requests

2100+
customer conversations

12
features developed in close customer co-creation

With Luzmo we build in 6 weeks what we previously did in 6 months.
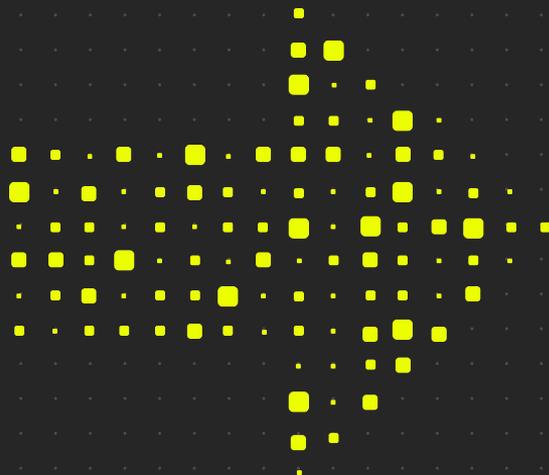

Connecting data is super easy, but I'd love more analytical tools to prep it for visualizations.

We want Embedded Studio to be as customizable as dashboards with Flex.

AI makes it so much easier to work with data, and I see a lot of opportunities in Luzmo.

Our focus

LUZMO

LUZMO

The fastest route to embedded analytics

Quick **time-to-market** with high **customization**
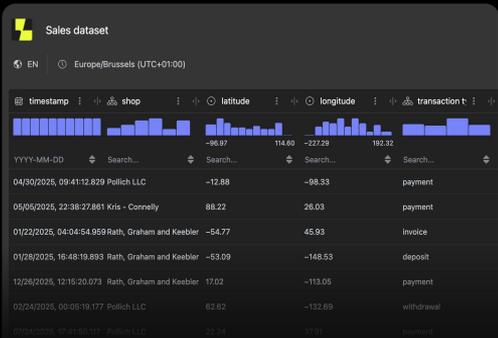

LUZMO

The fastest route to embedded analytics

Effortless embed-ready data

Make your data instantly ready, understandable, and trustworthy for humans and AI.
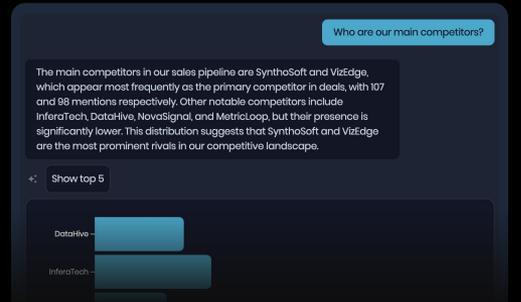

Native-feeling visuals anyone can build

The composable layer for native-feeling data products, empowering anyone to create beautiful and insightful charts.
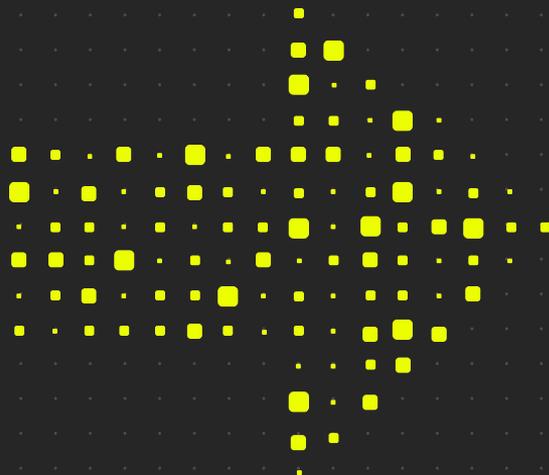

Truly self-serve analytics for end users

Help every end-user understand, personalize, and act on data, without relying on data analysts or static dashboards.
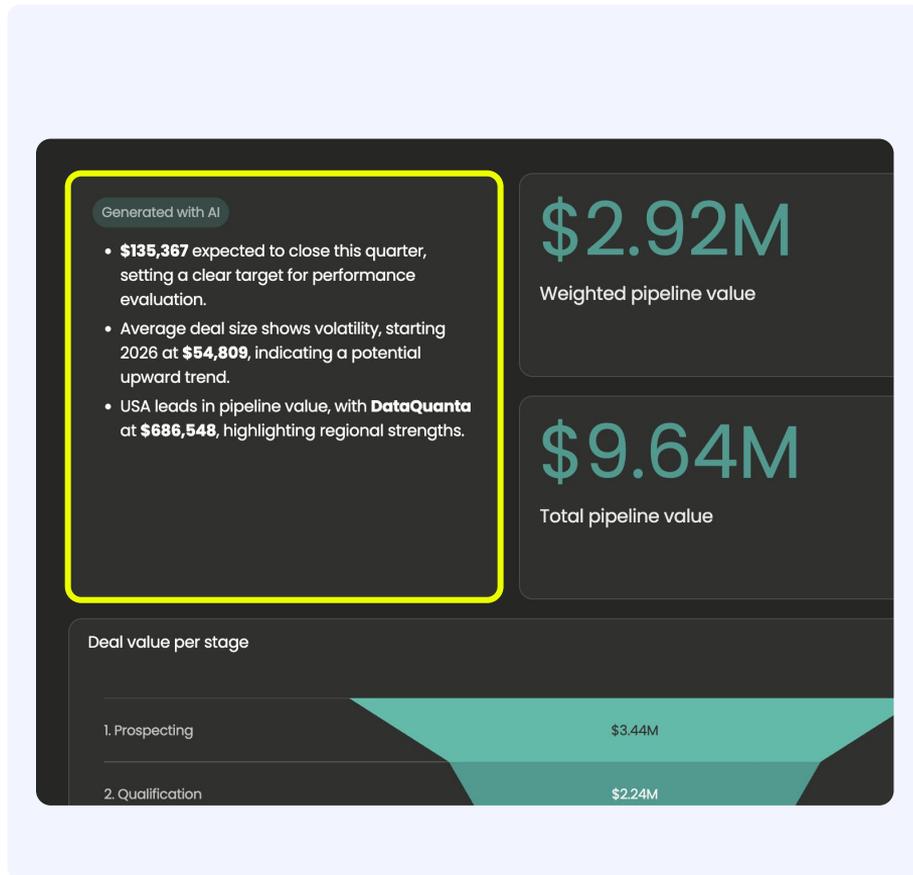

What we shipped

AI Summary

Add auto generated summaries to your dashboards, with full support for user context like filters or language settings.

Included in plans Pro and above.

How to get access

- Reach out to your CSM or our support team to access get access now.

Generated with AI

- **$135,367** expected to close this quarter, setting a clear target for performance evaluation.
- Average deal size shows volatility, starting 2026 at **$54,809**, indicating a potential upward trend.
- USA leads in pipeline value, with **DataQuanta** at **$686,548**, highlighting regional strengths.

$2.92M
Weighted pipeline value

$9.64M
Total pipeline value

Deal value per stage

| 1. Prospecting | $3.44M |
| 2. Qualification | $2.24M |

LUZMO

Metadata audit

AI-powered metadata suggestions

- Cleaner metadata strengthens AI-powered features like Luzmo IQ.
- Get instant recommendations for clearer column names, data types, and descriptions.
- Trigger metadata analysis directly from the Dataset Editor.

Included in all plans

How to get access (beta)

- Reach out to your CSM or our support team to access the beta.

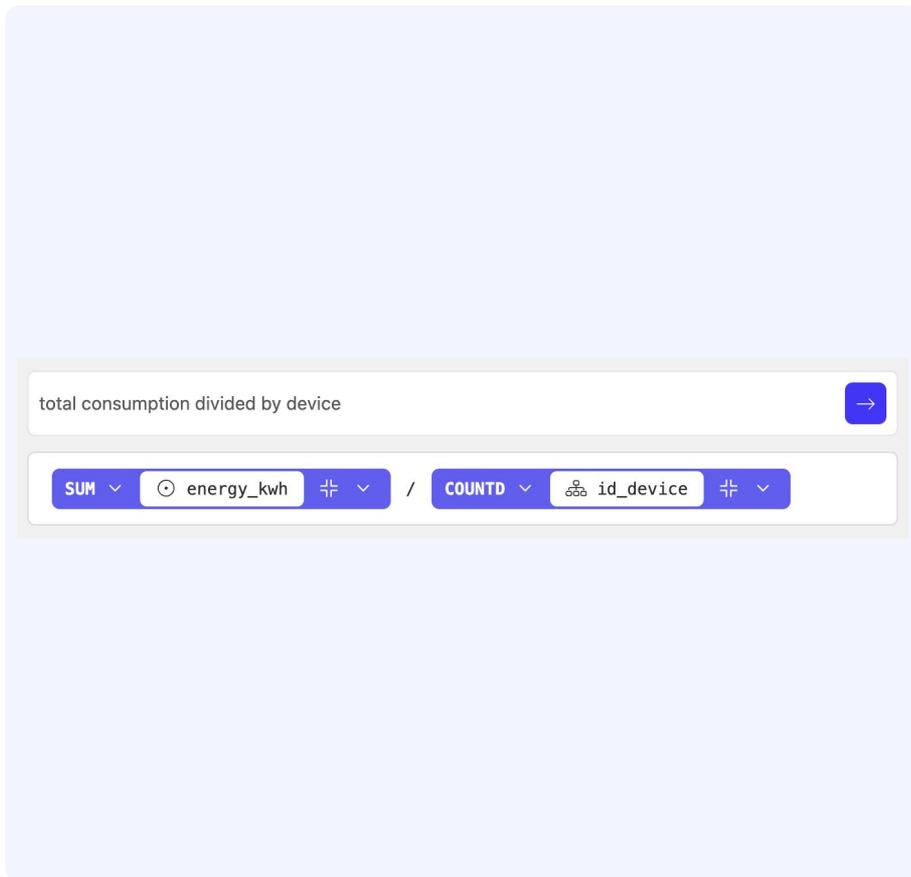

LUZMO

Prompt-to-formula

AI-powered Formula generator

- Use natural language to create your formulas
- No need to know perfectly the syntax

How to get access (beta)

- Reach out to your CSM or our support team to access the beta.

LUZMO

Period comparisons in pivot tables

Pivot tables now support all available period comparisons.

Included in all plans

How to get access (beta)

- Reach out to your CSM or our support team to access the beta.

LUZMO

Coming in Q1
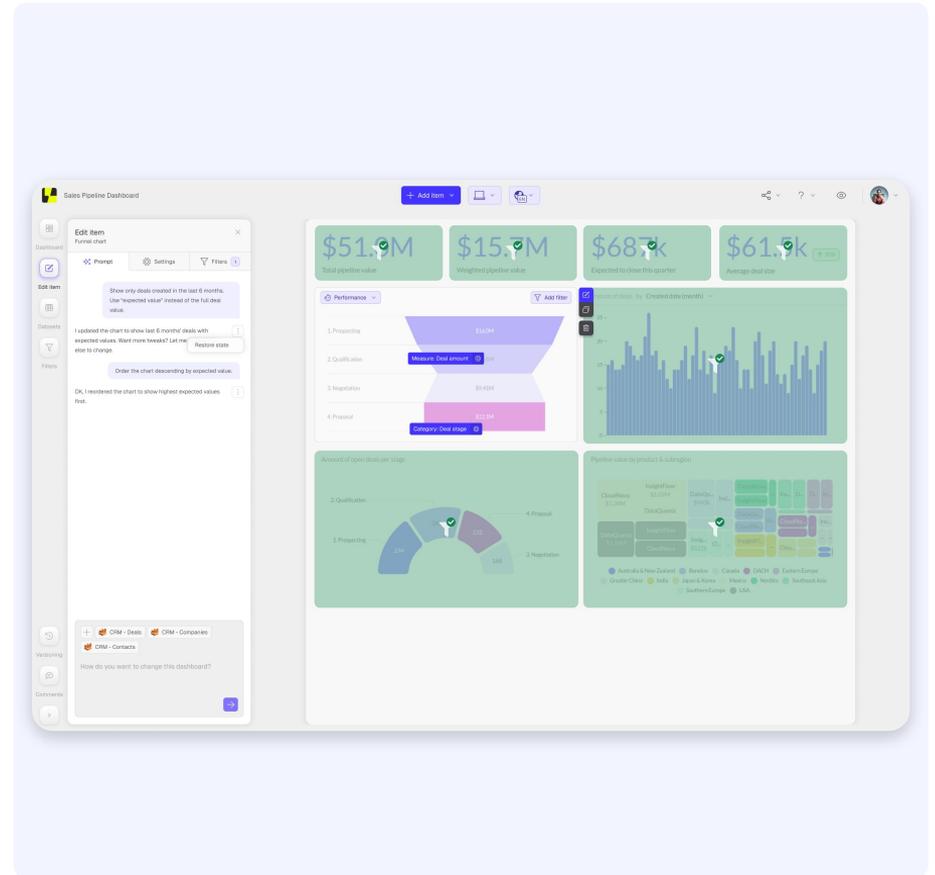

LUZMO

Sneak peak: Luzmo Studio

Refreshed Studio user interface
Modern look and feel, reduced clutter for a more
focussed building experience.

Build and edit dashboards in minutes
Speed up chart building through natural language
workflows.
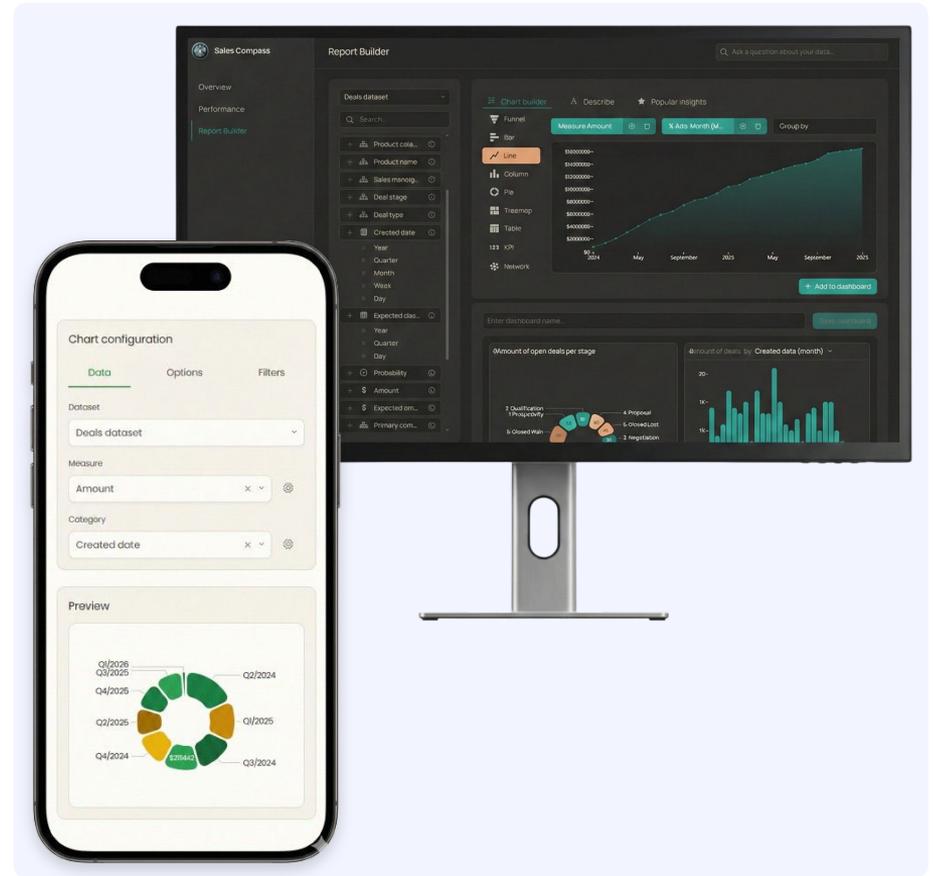

Included in all plans

LUZMO

Modular report builder

Building blocks to create your own embedded dashboard editing experience

Give your users control over their insights, with full control over the complexity you expose

Native look, multi-language, mobile friendly
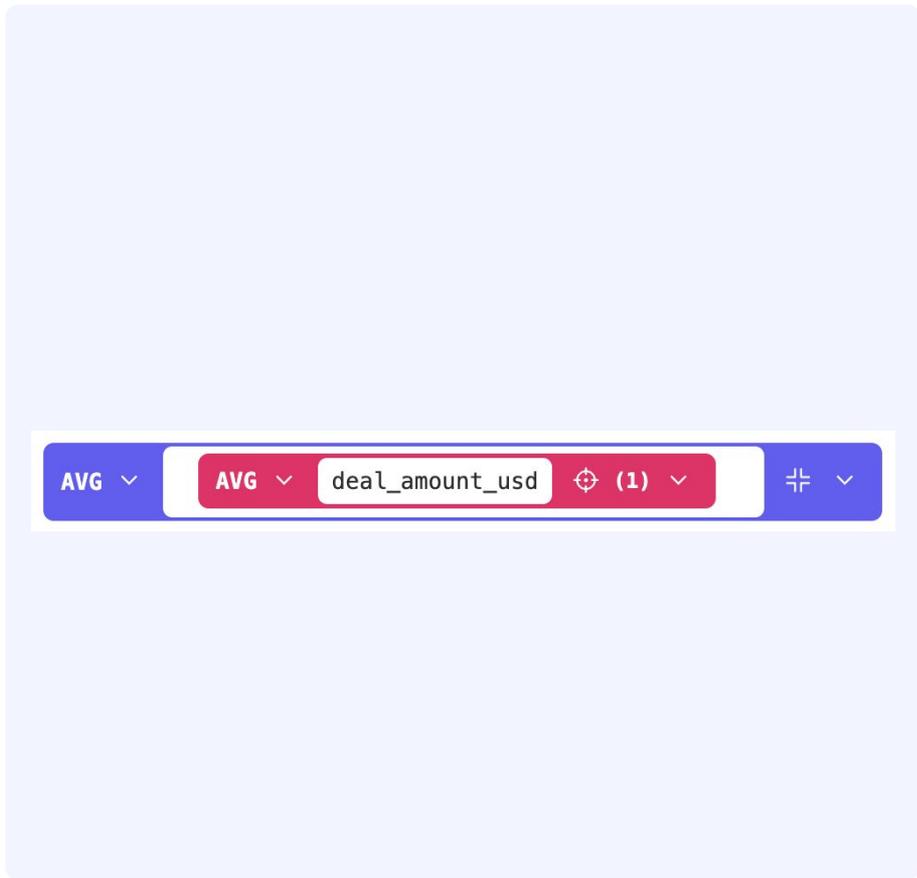

Composable plug-and-play components

LUZMO

Nested formulas [BETA]

Build multi-level KPIs by aggregating aggregated results.

Cut workarounds (less dataset duplication, fewer external calculations).

Keep it predictable (same UI, limited depth, clear validation errors).

LUZMO

Scaling Luzmo

Active users of embedded dashboards and visualizations grew by **35%** in 2025
